GSM Communicator
Dialler

The GSM speech and text communicator provides a simple yet effective solution to all of your security equipment notification needs.

Once triggered the GSM speech and text communicator automatically sends a voice or text message to one of nine designated, pre-programmed telephone numbers, providing a fast and reliable warning, ensuring total peace of mind.

Six inputs allow connection to intruder detection alarm panels, nurse call devices, gas and flood sensors. The additional four outputs can be linked to other associated equipment including strobe, siren or sounder.
