

Datasheet

GALEO BT - Bluetooth enabled keypad

Product Description

The GALEO BT is a keypad with remote electronics and 3 relays. Thanks to its Bluetooth connectivity, allows users to program their codes and manage settings using their smartphone with the free My Digicode app for Android and iOS.

My Digicode enables users to share an access via e-mail, not a code. Accesses offer multiple configuration options, including unlimited uses, specific hours on specific dates, or a quantity of times the access can be used.

My Digicode is also supplied with a widget for smartwatches* to authorise access to a property.

**Currently only available for Apple Watches*
