300ZL-AC, 500ZL-AC - Architectural Z&L-Bracket

Product Description

The 300ZL-AC and 500ZL-AC Z&L-brackets from CDVI deliver a premium architectural solution for inward-opening doors secured with maglocks.

Designed for style as well as security, the full-length Z-brackets create a seamless look by completely concealing the maglock when the door is closed. The lower section features a smooth quarter-radius infill that hides all fixing screws, while the upper section's gentle curve continues the clean lines and discreetly covers the armature bolts.

Each kit includes a standard L-bracket compatible with CDVI surface maglocks (see next page for details).

Key Features

- Architectural profile Z&L-bracket
- Brackets fit CDVI maglocks of 300, 400, and 500kg holding force
- Hides all screw fittings for a finished look
- Robust anodised aluminium construction
- Adjustment for deeper set doors with up to 20mm of adjustment
- Suitable for inward-opening doors
