

## Datasheet

### POWER SUPPLIES/ ADC335 - 3.5A, 12Vdc switch mode power supply

#### Product description

The ADC335 is a switch mode power supply, with full stated current to load - meaning it will deliver all the current it says it will. It is fuse protected on both the primary and secondary circuits, and being constructed of polycarbonate it is extremely safe, making it ideal for powering external gate locks or magnets.

CDVI offers a range of high quality power supplies to complement your access control and locking requirements, available in 12V and 24Vdc options.

#### Key features

- Regulated PSU
- High efficiency switch mode
- Sturdy and safe polycarbonate
- Primary and secondary protection
- DIN rail mount

 *Certification*

 *DEEE*

 *Certification*

 *IP20*

 *-10°C to 40°C*

## Product Specifications

**Material:** Sturdy polycarbonate

## Electrical Specifications

**Voltage:** 230Vac input, 12Vdc output

**Current:** 3.5A
