

RVK-W40-IRWL

Knight Watch 40 IRWL

Key Features

- 1/1.8" progressive Scan CMOS, 4MP Sensor
- PoE for Simple Plug and Play Connection
- Super Low-Light Performance
- Fixed Zoom/ Focus Lens
- Easy Positioning
- Cast Aluminium Body
- ONVIF Profile S, G & T Compliant
- 50m IR, 40m White Light
- Intelligent Video Analytics
- Audio In/ Out
- Built in Microphone and Speaker
- Adjustable Sun and Rain Visor
- IP66

KNIGHT WATCH 40 IRWL Bullet Camera

The Knight Watch 40 IRWL camera utilises leading-edge sensor technology, with a Super low-light CMOS sensor for high-quality images in daytime or night-time settings. PoE power means simple plug and play experience, with low power consumption (11.5W, IR on). White Light Illumination provides full colour images at night. A tough, stylish housing completes the high-quality offering.

Adaptive IR and White Light Illumination

Integral IR provide up to 50m of IR range, ensuring any night-time activity is captured in full HD with stunning image quality. The Dual IR and White Light Knight Watch 40 IRWL is fitted with White LEDs to provide full colour night time images up to 40m. The White LEDs can be activated upon alarm to act as a visible deterrent to any intruders.

Fixed Zoom/ Focus

The Dual Light Knight Watch 40 IRWL has a 4mm fixed focus lens to provide a wide field of view suitable for multiple applications.

Aluminium Body

A tough, solid cast aluminium casing results in the camera being well-protected against the elements and local environment, to IP66 standard. A rugged aluminium housing secures the camera whilst keeping the premises secure.

SD Card Recording

Built-in SD Card recording up to 256GB allows network edge-recording, making sure nothing is missed, even in the event of a network data outage. ONVIF Profile G compliance means the camera can work with a compatible VMS platform or NVR, to automatically interrogate and recover recorded footage, as soon as the network connection is restored.

ONVIF Compliant

ONVIF Profile S, G and T compliance offers compatibility with countless VMS platforms and NVRs. A H.265 streaming option means high-quality images at lower network bandwidth and hard-disk storage.

Additional Features

Motion Detection, Intelligent Video Analytics, Smart Encoding and Region of Interest allow users to tailor cameras to suit each individual scene, optimising recording time for only events or information that really matters to you.

Simple Installation

3D positioning arm allows users to find that perfect spot to view exactly what's required. An adjustable Sunshield ensures unwanted glare is kept out in almost any installation positions.

Microphone and Speaker

A built in microphone and loudspeaker allow users to operate two way audio to sites at a click of a button.
