PRESS RELEASE

Pyronix unveils Wireless LCD Advanced functionality. Everyday usability. Enhanced user experience.

Rotherham, UK, January 2026 – Pyronix announces the launch of its new Wireless LCD, a stylish, user-friendly solution that brings effortless control and enhanced flexibility to security systems. Designed with both installers and end users in mind, the wireless LCD keypad offers seamless integration, fast installation and powerful functionality — all without the hassle of wires.

“We’ve designed the Wireless LCD to make life easier for installers. It’s quick to fit, seamless to pair and packed with all the control you need,” said Laurence Kenny, Product Director at Pyronix.

With quick pairing, no wiring and full compatibility with the Enforcer V11 and EURO 76 (with wireless ZEM), the Wireless LCD streamlines setups. It provides complete access to system menus, enabling installers to program the system, add users or update settings all from a sleek, intuitive interface.

“The Wireless LCD is also built with the end user in mind,” Laurence added. “From real-time status updates and easy menu navigation to a backlit 34-character LCD screen for clear visibility in low light, it gives users complete control and peace of mind wherever it’s installed. Its wireless design means no compromise on placement or aesthetics.”

Powered by the same trusted CR123A batteries used across the Pyronix wireless range, the device helps simplify maintenance and streamline stock management. Purpose-built for seamless integration within the Pyronix ecosystem, it provides full supervision, jamming detection and a consistent, reliable user experience.

It also benefits from Pyronix’ updated wireless product warranty policy, which offers an additional one-year warranty extension when Pyronix batteries are used consistently throughout the product’s lifetime.

The Wireless LCD is available now through Pyronix distributors.
